

ECC Extended Day Program Guide

Our extended day program offers children in the threes to stay until 1:15 and fours and Pre-K to stay until 2:30. Children that stay are grouped together as best as possible by age group and remain with WJC teachers until pick-up. They enjoy lunch with their friends, participate in their choice of elective for approximately 30-40 minutes and then return to the classroom for dismissal or additional play-time. Elective classes will meet for approximately 20 of the 24 or so extended day weeks.

Dance & Drum (Monday)

A legend at WJC, Shmulik Gov-Ari, acclaimed Israeli choreographer, has created a unique program designed to engage children's multiple intelligences to teach Hebrew, Judaic values, Israel & holidays. The program interweaves drums, flags, fabrics, newspapers and other props with dance & song in a fun engaging manner. This program has been used with tremendous success over the past twenty years in schools in Israel, the United States, Europe and Asia.

Tae Kwon Do (Tuesday)

Back for the 2017/2018 year, Cosmo's Martial Arts Center bring us their Tae Kwon Do program. It teaches students to be healthy in body and mind. Through cardio vascular exercises, students will improve in strength, flexibility, balance, endurance and coordination skills. They provide an "I can do it!" approach to gain self-confidence and their instructors will always motivate students to develop a positive attitude toward life and challenge individuals to strive for their goals.

Art (Wednesday)

Taught by our very own teacher: Gal Segall

Back by popular demand, this art class will present well known Israeli artists like painter Reuven Rubin, sculptor Menashe Kadishman and others in a fun, engaging and creative way. Through story – telling, short films and pictures, important creations of each artist will lead to an art activity that will mimic the artist's work. Jewish holiday art will be introduced as well.

Fenom Fitness (Wednesday)

Back for the 2017/2018 school year, Fenom's FUNtastic fitness coaches lead the children through an imaginative and sensory journey consisting of obstacle courses and creative play. Their carefully constructed classes are built to encourage and engage curious minds and bodies in physical activities. Activities are primarily designed to develop motor skills and teach the basic concepts of following directions and working together. Students will gain the confidence needed to advance to the next level of sports and fitness in these Mash-Up classes!

Mad Science (Thursday)

An all-time favorite, this program provides hands-on interactive and educational science experiences which will give children a clear understanding of the scientific process and how science affects the world around them.
