

**ECC Extended Day Program Guide**

Our extended day program offers children in the threes to stay until 1:15 and fours and Pre-K to stay until 2:30. Children that stay are grouped together as best as possible by age group and remain with WJC teachers until pick-up. They enjoy lunch with their friends, participate in their choice of elective for approximately 30-40 minutes and then return to the classroom for dismissal or additional play-time. Elective classes will meet for approximately 20 of the 24 or so extended day weeks.

**Dance & Drum (Monday)**

A legend at WJC, Shmulik Gov-Ari, acclaimed Israeli choreographer, has created a unique program designed to engage children's multiple intelligences to teach Hebrew, Judaic values, Israel & holidays. The program interweaves drums, flags, fabrics, newspapers and other props with dance & song in a fun engaging manner. This program has been used with tremendous success over the past twenty years in schools in Israel, the United States, Europe and Asia.

**Tae Kwon Do (Tuesday)**

Back for the 2018/2019 year, Cosmo's Martial Arts Center bring us their Tae Kwon Do program. It teaches students to be healthy in body and mind. Through cardio vascular exercises, students will improve in strength, flexibility, balance, endurance and coordination skills. They provide an "I can do it!" approach to gain self-confidence and their instructors will always motivate students to develop a positive attitude toward life and challenge individuals to strive for their goals.

**Star Kidz (Wednesday)**

Brand new for the 2018/2019 school year, Star Kidz is a unique arts program that combines singing, acting and dancing. At the heart of this program is the belief that every child has a talent for creative expression. Some kids come in with tons of confidence, wanting a career onstage, and others enter super-shy and are just hoping to enjoy themselves and develop a sense of confidence.

**Mad Science (Thursday)**

An all-time favorite, this program provides hands-on interactive and educational science experiences which will give children a clear understanding of the scientific process and how science affects the world around them.
